Hey Calvin,

Thanks a lot for the note, appreciate you circling back.

My firm will be the owner and operator of the injection facility, so this is in line with our expectation. We're working hard on the various deliverables and plan to have them on your team's desk in 2021. Have a great weekend and talk soon

[EXTERNAL EMAIL: PLEASE BE CAUTIOUS]  
Andrew and Tiraz,

Thank you for presenting your potential class VI proposal to EPA last week. We wanted you to be aware that it is the operator's responsibility to submit a UIC permit application when the owner and operator of an injection facility are different. See 40 CFR 144.31(b). Hope this information is helpful.

Regards,
